

DIGITAL LEADERSHIP MANAGEMENT

STATEMENTS:

What is it all about?

Our working environment and understanding of new processes and technologies is subject to constant change. Because of the almost complete penetration of our live through the digital economy (technology, processes, understanding), we have to deal intensively with it.

Proven leadership and management strategies of the last decades considered increasingly obsolete. Digital Business Transformation and Business Model Innovation engages the values influences but also tools of modern Internet society and the Generation Y and creates an altered hierarchy and leadership understanding. This Agile management means in consequence but also change in openness, transparency and knowledge management. As so often, there is no universally valid blueprints for successful strategies. Many factors such as industry, product, competition, target groups and more influence on the „perfect“ digital transformation strategy.

The digital transformation specialisation for your MsA gives you the right incentives, current methods and working tools and ideally the personal digital strategy for present and future entrepreneurs, founders and executives.

Studiengangsleiter Herr Norbert Barnikel

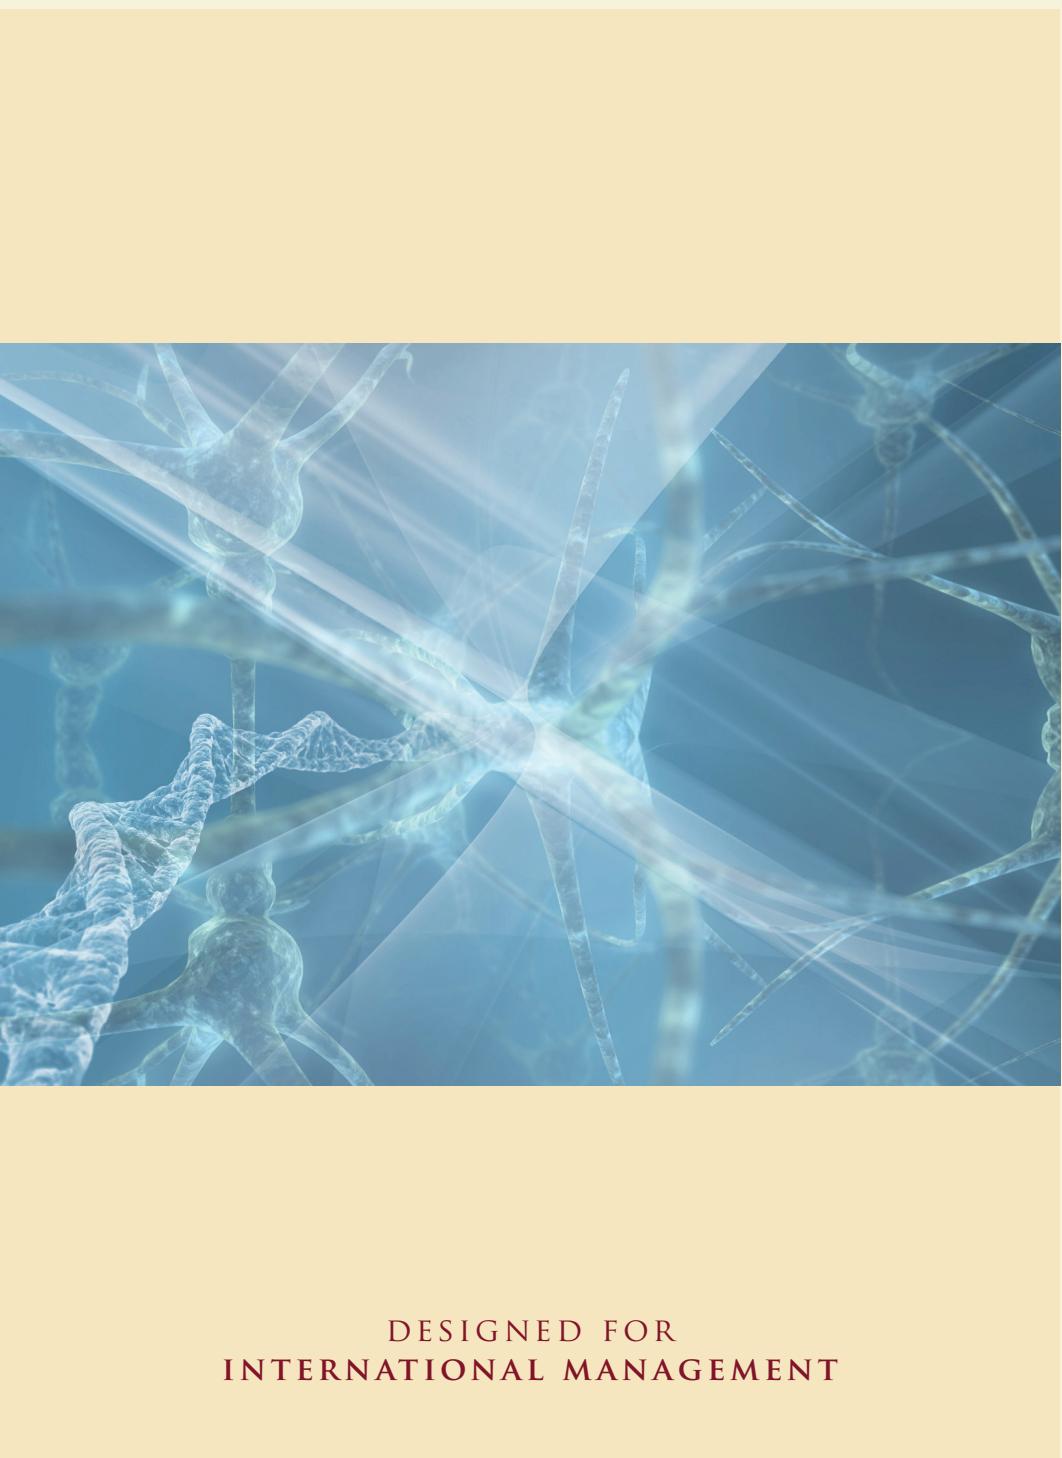

STUDIENGEÜHR:

525,00 Euro pro Semester mit 25 Vorlesungsstunden. Jedes Semester kann einzeln gebucht werden. Exkursionen sind individuell und optional.
