ACHIEVING SUCCESS

Experience abroad in a different culture promotes personal development and increases self-confidence. The way is paved for future plans and progress in the world of study and work.

VARIETY OF EDUCATIONAL PATHS

This variety offers optimal choices according to students' own interests and abilities. Students can attend either the regular high school or one of the professional high schools.

The professional high schools specialize either in economics and business or psychology and social science.

Both paths lead to final high school examinations which are pre-requirements for university entrance. The students will be able to study at a university of their choice.

AT THE BEGINNING

WELCOME

We warmly welcome foreign students at our school that offers a variety of educational paths and unique ambience of the historic surroundings. Any of the secondary school leaving qualifications that can be obtained are officially recognized. With our long tradition being a professional center for education we can assure schooling and boarding on a high level. Supporting common sense, taking care of each individual in a very personal and trustful manner and our lively extra-curricular programme make everyone feel immediately at ease.

GERMAN LANGUAGE SKILLS

For the optimal start students acquire of German language skills at level B2. This will enable them to integrate smoothly and build up friendships and feel the sense of community. We can establish contacts to well-known language institutes in order to develop language skills before school starts.

Foreign students need to provide valid visa.

VISA, INSURANCE AND PAYMENT

Foreign students need to provide valid visa. As the regulations vary depending on the home country, we support the visa application process in advance and take care of prolongation processes.

For secure living we offer an additional insurance package for each student.

The yearly costs for boarding, schooling, fees and optional services will be calculated in advance on a reliable and transparent basis. At the end of each school year a detailed cost summary and adjustment to the advance payment will be provided.

OUR BOARDING HOUSES AND GROUNDS

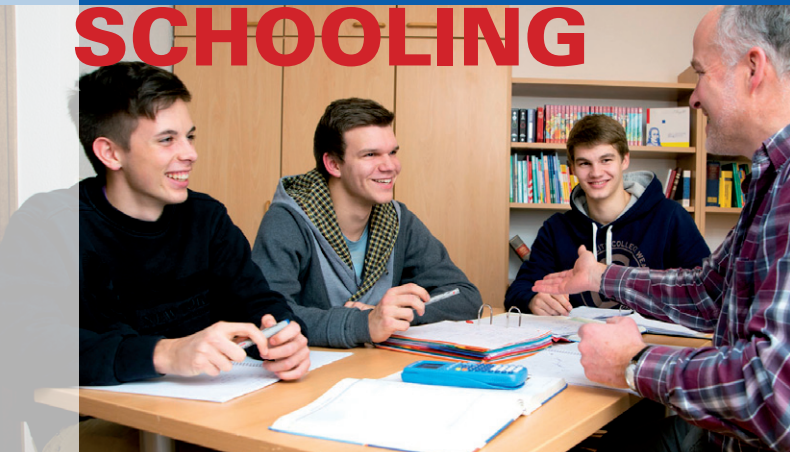

School and boarding houses provide modern equipment and cosy bedrooms. Students' needs for quiet or computer work as well as sporting, recreation or relaxation are fulfilled by the wide range of facilities. Spacious grounds for football, hockey, basketball, fitness, volleyball and table tennis are available.

VACATIONS

We assume that the foreign students travel home at least during the summer and Christmas vacations. If there is no contact point in Germany, the students will visit language courses or take part in other suitable activities during the remaining vacations after prior consultation. Foreign students are taken care of in our boarding school during weekends when school is closed.

DURING SCHOOLING

LEARNING

Besides the regular schooling our additional learning campus facilitates all aspects of learning. There the students can attend study blocks in the evening and get assistance from the teaching staff. Study plans respect not only the student's timetable but also leisure time activities and any barriers to learning.

MUSIC AND THEATRE

Music and theatre are always given high priority. Students can play instruments in an orchestra, sing in the choir or do theatre performances. This enhances personal development and boosts self-confidence.

SPORTS

Sports are also an important part of boarding house life (football, basketball, table tennis, mountain biking) and are integrated in the wide range of options for constructive recreation. Joint activities and excursions (swimming pool or skiing trips, games, Christmas markets, concerts, barbecues, arts and crafts) help promoting a sense of community.

PERSONAL DEVELOPMENT

Counting on others and being reliable oneself - in other words being able to work as part of a team - are essential life skills. The young people in our boarding houses learn what this means in a

very practical way. Friendships made within the boarding community often last a lifetime.

A HOME AWAY FROM HOME:

- Individual and personal assistance
- Competent and experienced personnel
- Modern equipment and unique ambience
- Living, learning and friendships
- Study blocks in the learning campus and educational guidance
- Wide options for recreation and activities
- Fresh and wide variety of meals
